Emotional well-being is just as important as your physical, financial, and mental well-being. Being emotionally stable includes being able to withstand minor setbacks, failures, difficulties, and other stresses without becoming upset emotionally. Emotional stability consists of being able to understand, tolerate and overcome obstacles such as anxiety, stress and depression. Depressive disorders affect approximately 18.8 million American adults or about 9.5% of the U.S. population age 18 or older in a given year. This includes major depressive disorders, dysthymic disorder, and bipolar disorder.

If the sad feelings continue for a prolonged period of time and interfere with enjoyment of life, it could be depression. Participants will learn to:

- Recognize the myths about depression
- Clarify the difference between depressive disorders and the "blues"
- Define depression and the various types
- Identify the symptoms, causes, evaluation components, and treatments for depression
- Learn ways to cope with depression and support a family member or friend who is depressed

Fact: Thomas Alva Edison (February 11, 1847 - October 18, 1931), developed many devices that greatly influenced life around the world, including the phonograph, the motion picture camera, and a long-lasting, practical electric light bulb. Dubbed "The Wizard of Menlo Park" (now Edison, NJ) by a newspaper reporter, he was one of the first inventors to apply the principles of mass production and large-scale teamwork to the process of invention.

Thomas Edison was born in Milan, OH, and grew up in Port Huron, MI. He died of complications of diabetes on October 18, 1931, in his home, "Glenmont" in Llewellyn Park in West Orange, NJ. He is buried behind the home.
