#### Deadlines

National Science Foundation, Joint DMS/NIGMS Initiative to Support Research at the Interface of the Biological and Mathematical Sciences

The Division of Mathematical Sciences (DMS) in the Directorate for Mathematical and Physical Sciences (MPS) at the National Science Foundation (NSF) and the National Institute of General Medical Sciences (NIGMS) at the National Institutes of Health (NIH) plan to support research in mathematics and statistics on questions in the biological and biomedical sciences. Both agencies recognize the need for promoting research at the interface between the mathematical sciences and the life sciences. This program is designed to encourage new collaborations, as well as to support existing ones.

<https://www.nsf.gov/pubs/2017/nsf17569>

Next Deadline: September 18, 2017

National Historical Publications & Records Commission, Access to Historical Records: Archival Projects

The National Historical Publications and Records Commission seeks projects that ensure online public discovery and use of historical records collections. All types of historical records are eligible, including documents, photographs, born-digital records, and analog audio and moving images. Projects may preserve and process historical records to:

- Create new online Finding Aids to collections
- Digitize historical records collections and make them freely available online

The NHPRC encourages organizations to actively engage the public in the work of the project.

Next Deadline: October 5, 2017

National Historical Publications & Records Commission, Public Engagement with Historical Records

The National Historical Publications and Records Commission seeks projects that encourage public engagement with historical records, including the development of new tools that enable people to engage online. The NHPRC is looking for projects that create models and technologies that other institutions can freely adopt. In general, collaborations among archivists, documentary editors, historians, educators, and/or community-based individuals are more likely to create a competitive proposal. Projects that focus on innovative methods to introduce primary source materials and how to use them in multiple

locations also are more likely to create a competitive proposal.
