## Workshops

Multiple Regression using SPSS

Multiple regression, a very popular statistical method, allows us predict the value of a variable based on the value of two or more other variables. This workshop will give a hands-on introduction on how to carry out multiple regression using SPSS, including interpreting the output.

Wednesday February 14 **OR** Thursday February 15, ( 2:00-3:30pm ); G11 Halle Library

## Deadlines

National Science Foundation, Dear Colleague Letter: Belmont Forum Joint Initiative with BiodivERsA

The Directorate for Geosciences is participating with the Belmont Forum<sup>1</sup> on a new call for proposals, "Scenarios of Biodiversity and Ecosystem Services II," in partnership with BiodivERsA<sup>2</sup>. This call invites proposals that explicitly address a biodiversity scenario, considering the following definition: "Scenarios of biodiversity and ecosystem services are the

outputs of the combination of scenarios of indirect drivers and direct drivers — such as land use change, invasive alien species, overexploitation, or pollution — and models of impacts of these drivers on biodiversity and ecosystem services."

The Belmont Forum will support, on a competitive basis, collaborative projects co-designed by teams of researchers from at least three participating countries. These interdisciplinary teams will bring together natural scientists, social/economic scientists and research users, such as policy makers, regulators, non-Governmental organizations (NGOs) and industry. Proposals will be jointly reviewed by a panel of experts and the participating funding organizations. Successful projects are expected to demonstrate added value through multilateral collaboration. Support for U.S.-based researchers will be provided through awards made by the National Science Foundation.
