Updated July 3, 2017

Meetings

Road Tour: Small Business Innovation Research/ Small Business Technology Transfer (SBIR/SBTT)

EMU Student Center

July 19, 2017

The SBIR road tour is coming to Michigan. Eastern Michigan, that is!

BBC Entrepreneurial Training and Consulting, LLC will host this day-long event. Program managers from multiple agencies will be attending. Don't miss a chance to speak with them in your own backyard...

Schedule:

8 – 8:30 AM Check in

8:30 – 8:50 AM Welcome / Introductions

8:30 AM – Noon Meetings with Program Managers

9 AM – Noon Agency Panel Discussions

12:15 – 1:30 PM Lunch: MI Success Stories

1:45 – 2:45 PM Top 10 Proposal Dos and Don'ts

3 – 4 PM Essentials of Commercialization Planning

3 – 5 PM MI Entrepreneurial Support Resources

5 – 6 PM Informal Networking

Deadlines

National Science Foundation, Joint DMS/NIGMS Initiative to Support Research at the Interface of the Biological and Mathematical Sciences

The Division of Mathematical Sciences (DMS) in the Directorate for Mathematical and Physical Sciences (MPS) at the National Science Foundation (NSF) and the National Institute of General Medical Sciences (NIGMS) at the National Institutes of Health (NIH) plan to support research in mathematics and statistics on questions in the biological and biomedical sciences. Both agencies recognize the need for promoting research at the interface between the mathematical sciences and the life sciences. This program is designed to encourage new collaborations, as well as to support existing ones.

Next Deadline: September 18, 2017

National Historical Publications & Records Commission, Access to Historical Records: Archival Projects

The National Historical Publications and Records Commission seeks projects that ensure online public discovery and use of historical records collections. All types of historical records are eligible, including documents, photographs, born-digital records, and analog audio and moving images. Projects may preserve and process historical records to:

- Create new online Finding Aids to collections
- Digitize historical records collections and make them freely available online

The NHPRC encourages organizations to actively engage the public in the work of the project.

Next Deadline: October 5, 2017

National Institutes of Health, National Center for Complementary and Integrative Health Natural Produce Phase I-IIa Clinical Trial Award

This Funding Opportunity Announcement (FOA) invites applications for investigator-initiated early phase clinical trials of natural products (i.e., botanicals, dietary supplements, and probiotics), which have a strong scientific premise to justify further clinical testing. Under this FOA, trials must be designed so that results, whether positive or negative, will provide information of high scientific utility and will support decisions about further development or testing of the natural product.

Next Deadline: October 4, 2017

National Historical Publications & Records Commission, Public Engagement with Historical Records

The National Historical Publications and Records Commission seeks projects that encourage public engagement with historical records, including the development of new tools that enable people to engage online. The NHPRC is looking for projects that create models and technologies that other institutions can freely adopt. In general, collaborations among archivists, documentary editors, historians,

educators, and/or community-based individuals are more likely to create a competitive proposal. Projects that focus on innovative methods to introduce primary source materials and how to use them in multiple locations also are more likely to create a competitive proposal.

Next Deadline: October 5, 2017

National Institutes of Health, National Cancer Institute Integration of Individual Residential Histories into Cancer Research (R21)

The purpose of this Funding Opportunity Announcement (FOA) is to support substantive investigation of the role of individual residential histories in cancer etiology and outcomes, and to encourage the development of complex analytical strategies in support of substantive investigation. This FOA is expected to engage scientists from a range of disciplines, including epidemiology, statistics, geospatial science, computer science, demography, decision science, and behavioral science, to effectively integrate individual residential histories into cancer research.

Geospatial expertise is essential for generating new knowledge about the residential context relative to cancer risk, etiology, prevention, treatment, and outcomes. Computer science and informatics are crucial for the development of methodology that would ensure more precise matching of residential information and location (geocoding), improve linkage to automated data sources, and generate reliable lifetime residential histories. Cancer surveillance science, in conjunction with statistical, epidemiological, and medical expertise, is extremely important in answering substantial questions related to the use of lifetime residential histories in the analysis of cancer risk and cancer burden. In addition, a combination of scientific expertise in demography and behavioral science in addressing the role of lifetime residential histories in the context of cancer can help facilitate more precise assessment of cancer disparities.
