A university is a library surrounded by a bunch of other buildings.  
(Foote, late-20th century)

A library is a coffee shop surrounded by a bunch of books.  
(Wikipedia, early 21st century)

Library?  
(LaBaugh, mid-21st century)

Late last week, daughter #2 pushed out a healthy, happy, slippery wee bairn the size of a Butterball. Cringe. As I am still on the other side of the planet, I couldn’t be there in person, but thanks to Sprint, Skype and Al Gore (for inventing the Internet), I could sit comfortably in my kitchen as the pixilated pixie came screaming into the world. When mother and daughter fell fast asleep, I quietly logged off, shut down the ‘puter and, too, took to bed. Sleep came fast, but fitfully.

In my dream, I woke up worrying I wouldn’t make my 08:00 GMT connection and would be late for work. With net traffic at rush, if I didn’t make login by then, I’d have to pay an additional salik (road toll) of 5 geuros (global euros) and I’d be docked 15 minutes. I shouted, “On, login, work!” and heard the faint staticky sound of the wall screen brighten.

I adjusted my visor. “Good morning, Ross” blazed around the room. I didn’t know how long I had worked at EVL (the Electronic Visual Library) as a CIN (Counselor in Information Navigation) and, though this routine felt unnatural, it also felt familiar. Today, I had a meeting with five students doing a project on medical tourism. Ugh. Since Jenna Bush-Obama’s stroke from implant poisoning back in the 2049, this has been a hot pick with the beginners. I make a mental note to put this topic on the “You can not choose from this list” list (along with nano rights, the rise and fall of U.A.E., and legalization of marijuana). I’m meeting them in my office at the 3rd level DunkinBucks of EVL. It’s our first vf2 (virtual face-to-face) so I’m not sure how I will recognize them when they develop (log into their AVs). Two clicks after I get there, though, I see three, black-bereted lites mater-
“It was so cheap, too!” another student adds.

“Tell me more about your presentation,” I ask in the most neutral tone I can muster.

“Owl (that’s the name of the TA in Eckhart’s class) told us it can’t be more than 5 minutes long and we have to use words, not just images. Ugh, I hate words.”

“We can use that hol (hologram) my mom gave us. It has words,” Jarry says.

“That sounds like it may be of some use,” I say, “though it may be a bit biased.” Screes flicker as the word biased is defined. “I’m sure we’ll find lots of other sources, too; they will all have words. I’m concerned about the length of your presentation, though. Five minutes is not very long and there are five of you,” I say.

“Four,” the quiet one corrects me, “but, really three cause Dodi hasn’t come, ever!”

“What thoughts do you have about how you will bit this (break into segments)?”

“Jarry is doing the Bangkok trip ‘cause it’s like her mom and she can interview her. Nora is going to do the good effects, and I’m going to do the bad effects. And Dodi is going to do the intro and conclusion ’cause that’s what we assigned him.”

“What uni is he with?” Nora asks.

“He’s at Harpo.edu I think,” Jarry replies.

“Is that the one in Chicago?”

“Bid (back in the day),” I answer. “It’s a VU (virtual university) now.”

“Getting groups together can be difficult,” I say, trying to get us back on track, “but it sounds like you’ve begun thinking about the topic and that’s good. It also seems that our meeting today comes at a good time because you haven’t solidified your subtopics completely and you’d be willing to consider shaping your presentation around the kinds of information we may find this morning.”

I realize that I’m projecting more than I should here, but we really don’t have much time.

“Morning?” one of the lithes says. “It’s 11:00 pm here; I’ve got to login to work in an hour.”

I forget these students are from all over the planet.

“Well, let’s move on then, so you won’t be late. Take a look at your screens. I’ve just done a quick scan of medical tourism and it looks like the NLM and Bloomberg libraries are good. See how they have the little red flame next to them? Your UniUni (Universal University ID) will get you in.”

“Can’t we just net this?” Nora asks.

“You could, but I don’t think the public filters are good enough. There’s a lot of flotsam out there.” Screes flicker.

I press on. “You mentioned that Owl wants words, so how about we brainstorm a bit more about your topics, then we can meet at Bloomberg’s next time and use their uni filters to find some info.”

“But don’t they charge for that?”

“Yes, but your edbens cover the cost. You’ve already paid for it.”

“My other dad goes there all the time,” Nora says. “But he’s a docstu. I wouldn’t have any idea what to do when we got there.”

“I’ll be there with you. It’s easy. Really. And, they have this great funi filter (first-year university) that nets to your level, language and goal. Just pop in you UniUni and scree the results.”

“It would be great if it did the presentation, too!” Jarry says half kidding.

“It won’t,” I smile. “And, besides, that would be unethical, wouldn’t it?” Screes flicker longer than usual.

(Dream A Little Dream...Continued on page 10)
use of Blackboard to encourage feedback and manage course content will ameliorate technological advancement. Future teachings of LIB 101 may incorporate video and audio streamed through a Flash Player or online tutorials with links on the library homepage. Regardless of which format each instructor chooses, the librarians at Delta State University will continue teaching students essential library and technology skills to enhance their academic, professional, and personal lives.

Resources List:

Additional activities, using RSS feeds and podcasts, also helped students to understand some of the basics of research and relevance. Future experiments will include blogs as research logs and Wikipedia article creation.

For more information about the conference, and the PowerPoint presentations and handouts for many of the sessions, including from all the sessions listed in this article, visit the website at http://www.loexconference.org/2008/sessions.htm

“Besides,” I say. “Finding the info is the easy part. It’s figuring out what you need, and then figuring out how to use it is where the real work is.”

“Everything is different but everything’s the same.” I sing to myself.

A few minutes later, Jarry says, “I gotta go. The baby’s crying.”

To this day, I have a hard time remembering that there are real people on the other side of these AVs.
