On this day...

On this day in 1900 - Professor Max Planck of Berlin University revealed his revolutionary Quantum Theory.

Quote:

“Be courteous to all, but intimate with few; and let those few be well-trying before you give them your confidence.” - **George Washington**

Fact:

The [Wright brothers](#), **Orville** (August 19, 1871 – January 30, 1948) and **Wilbur** (April 16, 1867 – May 30, 1912), were two American brothers, inventors, and aviation pioneers who were credited with inventing and building the world's first successful airplane and making the first controlled, powered and sustained heavier-than-air human flight, on December 17, 1903.

At Kill Devil Hills, NC, Wilbur won a coin toss and made a three-second flight attempt on December 14, 1903, stalling after takeoff and causing minor damage to the Flyer. Following repairs, the Wrights finally took to the air on December 17, 1903, making two flights each from level ground into a freezing headwind gusting to 27 miles per hour. The first flight, by Orville, of 120 feet in 12 seconds, at a speed of only 6.8 miles per hour was recorded. The next two flights covered approximately 175 feet and 200 feet, by Wilbur and Orville respectively.
