*** SHOULD WE BE WORRIED ABOUT EARTH'S SOIL?:** Campus Life is pleased to welcome David Montgomery to EMU to speak about "*Dirt: The Erosion of Civilization,*" on **Tuesday, February 19**, at 7 p.m., in the Student Center Auditorium. Montgomery is the author of 'Dirt: The Erosion of Civilizations,' which makes the case that we are using up Earth's soil. Once bare of protective vegetation and exposed to wind and rain through agriculture, cultivated soils erode bit by bit, faster than they can be naturally replenished. The erosion is slow enough to be ignored in a single lifetime but fast enough over centuries to limit the lifespan of civilizations. In this engaging lecture, Montgomery traces the role of soil use and abuse in the history of societies, from Mesopotamia to European colonialism and the American push westward. He explores how soil has shaped us and we have shaped soil. This is a free event and is open to the public, no tickets required.
