EMU COVID-19 Dashboard, March 29, 2021

Eastern Michigan University

EMU COVID-19 Dashboard

Total EMU Population*: 18507

This Dashboard conveys important information about cases of COVID-19 and COVID-19 testing completed at the direction of the University. This Dashboard is updated several times per week. These efforts are part of our comprehensive phased [Safe Return-to-Campus Plan](#) for the 2020-2021 academic year. We may continue to add new metrics to this Dashboard as we move toward an expanded scope of campus operations.

COVID-19 Testing

Tests administered by EMU** - cumulative 30,836 <small>since 08/12/20</small>	Positive tests - cumulative 343 <small>since 08/12/20</small>	% Positive - cumulative 1.11% <small>since 08/12/20</small>
Tests administered by EMU - last seven days 1,197 <small>from 03/21/21 to 03/27/21</small>	Positive tests - last seven days 5 <small>from 03/21/21 to 03/27/21</small>	% Positive - last seven days 0.42% <small>from 03/21/21 to 03/27/21</small>

* "Total EMU Population" is defined as the following as of 9/10/20: all regular employees + all registered students.
 ** "Tests administered by EMU" is defined as COVID-19 tests that were administered by, or at the direction of, the University.

Positive Cases*

On-campus Isolation* & Quarantine** Beds as of (03/29/2021)

The University has set aside 108 beds for isolation and quarantine of students who are unable to isolate or quarantine in their residence. The chart reflects the occupancy of these beds and does not include on-campus residents who are in isolation or quarantine in their on-campus apartment.

* "Isolation" separates people with a confirmed case of COVID-19 from the population so that they can recover and reduce the risk of passing on the virus to others. Individuals who test positive for COVID-19 will be subject to isolation and will receive instructions from their health care provider, the County Health Department, and/or University offices (e.g., Housing) as applicable. Asymptomatic individuals must self-isolate until ten (10) days have passed since the initial positive test. Persons with symptoms must self-isolate until ten (10) days after symptoms first appeared and 24 hours with no fever and improvement in other COVID-19 symptoms.

** "Quarantine" keeps someone who has been exposed to COVID-19 away from other people. Quarantine applies to anyone who has been in "close contact" in the last fourteen (14) days with someone who is symptomatic or diagnosed with COVID-19. The person who has had close contact must stay home and self-quarantine for 14 days after their last exposure to that person.
