EMU COVID-19 Dashboard, December 22, 2021

Eastern Michigan University

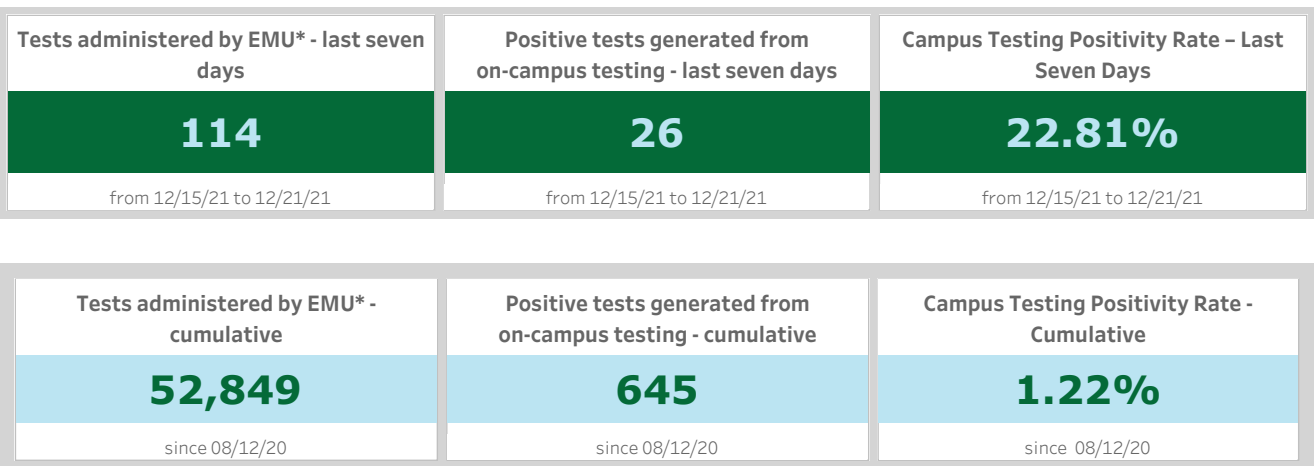

EMU COVID-19 Dashboard

University COVID-19 Cases*

* "University COVID-19 Cases" is defined as individuals who report testing positive for COVID-19 through testing administered by the University, self-reporting, or other validated sources.
 ** "Off-campus" student is defined as a student who had no contact with campus during the applicable time period prior to the time they tested positive for COVID-19. This includes students who were tested before arriving on campus.
 *** "On-campus" student is defined as a student who was living on campus OR had visited campus during the applicable time period prior to the time they tested positive for COVID-19.

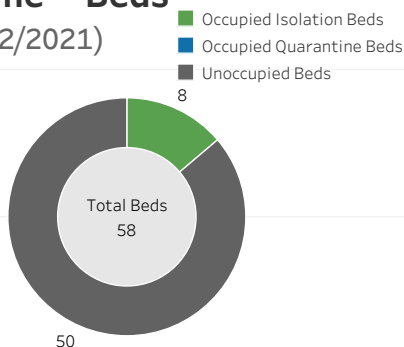

COVID-19 Tests Administered By EMU On Campus

* "Tests administered by EMU" is defined as COVID-19 tests administered by the University at or through the [campus testing center](#). This number does not include COVID-19 tests administered off-campus even though employees and students are required to [report](#) off-campus positive test results to the University

On-campus Isolation* & Quarantine** Beds

as of (12/22/2021)

The University has set aside 58 beds for isolation and quarantine of students who are unable to isolate or quarantine in their residence. The chart reflects the occupancy of these beds and does not include on-campus residents who are in isolation or quarantine in their on-campus apartment.

* "Isolation" separates people with a confirmed case of COVID-19 from the population so that they can recover and reduce the risk of passing on the virus to others. Individuals who test positive for COVID-19 will be subject to isolation and will receive instructions from their health care provider, the County Health Department, and/or University offices (e.g., Housing) as applicable. Asymptomatic Individuals must self-isolate until ten (10) days have passed since the initial positive test. Persons with symptoms must self-isolate until ten (10) days after symptoms first appeared and 24 hours with no fever and improvement in other COVID-19 symptoms.

** "Quarantine" keeps someone who has been exposed to COVID-19 away from other people. Quarantine applies to anyone who has been in "close contact" in the last fourteen (14) days with someone who is symptomatic or diagnosed with COVID-19. The person who has had close contact must stay home and self-quarantine for 14 days after their last exposure to that person.

Total EMU Population*: 17,546

* "Total EMU Population" is defined as the following as of 10/1/21: all regular employees + all registered students.
