Resolution 20071205

Faculty Senate

Resolution 20071205

Resolution on EMU Going “Green.”

The following resolution was presented for vote at the next University Faculty Council meeting (on January 9, 2008). Representatives are requested to forward the resolution to the people whom they represent and get feedback from them.

“Because sustainability is critical to ensuring the health of our nation and planet, many American colleges and universities have demonstrated leadership by becoming models of energy efficiency and environmental stewardship.

Be it therefore resolved that the EMU Faculty Council will appoint a three person committee to investigate, evaluate, and report on EMU’s present commitment to sustainability and to make recommendations for future sustainability initiatives at EMU. The committee will report its findings by the beginning of the Winter 2009 academic term.”
