BEWARE: NEW "RANSOMWARE" COMPUTER THREAT: A new type of malicious computer threat called CryptoLocker is receiving a lot of attention because of its extremely harmful and potentially irreversible consequences. Known as "ransomware," this type of attack encrypts files on infected computers running Microsoft Windows. Victims must pay a sizeable "ransom" to decrypt and recover their files. CryptoLocker can seize files on a computer hard drive, as well as on shared network drives, USB drives, and even some cloud storage connected to an infected computer.

CryptoLocker generally infects computers through malicious email attachments, such as fake FedEx and UPS tracking notices. Do not open email attachments unless you can verify that they are safe. Since email addresses can be spoofed, do not open attachments you did not request, even if they appear to be from someone you know and trust.

For more information about cyber security and safe computing, visit www.emich.edu/esafe.

"THE LITTLE STAR THAT COULD"

"The Little Star That Could" is a story about Little Star, an average yellow star in search for planets of his own to protect and warm. Along the way, he meets other stars, learns what makes each star special, and discovers that stars combine to form star clusters and galaxies. Eventually, Little Star finds his planets. Each planet is introduced to your audiences with basic information about our Solar System. Show dates and times are:

- **Tuesday, Nov. 26** - Showtime 6 p.m.
- **Saturday, Dec. 7** - Showtime 2 p.m.

Run time is 35 minutes and is appropriate for all ages, recommended for families. K-6 Education Guides are available. Each "Little Star" show includes "Seasonal Stargazing" with a run time of 7 minutes. Please visit the "[Little Star That Could](#)" to see a preview of the movie.

"SEASON OF LIGHT":

The EMU Planetarium presents an all-new show just in time for the holidays. "Season of Light" presentation traces the history and development of many of the world's most endearing holiday customs, all of which involve lighting up the winter season — from the burning Yule log, sparkling Christmas tree lights and candles in windows, to the lighting of luminaries in the American Southwest and the traditional ritual of the Hanukkah Menorah. Show dates and times are:

- **Saturday, Nov. 23** - Showtime 3:15 p.m.
- **Tuesday, Nov. 26** - Showtime 7:15 p.m.
- **Saturday, Dec. 3** - Showtime 8 p.m.
- **Saturday, Dec. 7** - Showtime 3:15 p.m.
- **Tuesday, Dec. 10** - Showtime 8 p.m.
- **Saturday, Dec. 14** - Showtimes 2 p.m. & 3:15 p.m.

The show also recounts the historical religious and cultural rituals practiced during the time of winter solstice — not only Christian and Jewish, but also Celtic, Nordic, Roman, Irish, Mexican and Hopi. It also takes a look at some of our more light-hearted seasonal traditions: from gift-giving and kissing under the mistletoe, to songs about lords a-leaping and ladies dancing, and the custom of decking the halls with greenery and candles. St. Nicholas, Sinterklaas, Kris Kringle, Father Christmas, and Santa Claus all drop by as well.

Naturally, there is some astronomy in "Season of Light". Audiences learn a selection of Northern hemisphere winter constellations, and find out why we even have seasons, as we demonstrate the Sun's path across the sky throughout the year, and the Earth's tilt and orbit around the Sun. And of course, the program explores the possible astronomical explanations for a "Star over Bethlehem" in the last quarter of the show: comets, meteors, novae and supernovae, and planetary conjunctions. Appropriate for all ages. Run time is 36 minutes. Each "Season of Light" show includes "Seasonal Stargazing" with a run time 15 minutes. Please visit ["Season of Light"](#) to see a preview of the movie.

CONCERT FEATURING WU:LIM: Hansori, the Korean drumming band will host a solo concert on **Saturday, Nov. 23**, at 7 p.m., in the Student Center Auditorium. A donation of \$5 at the door is suggested and will assist Hansori in purchasing uniforms and instruments. Please visit their [Facebook Page](#) for more information. Fact:

The [Piltdown Man](#) was a hoax in which bone fragments were presented as the fossilised remains of a previously unknown early human. These fragments consisted of parts of a skull and jawbone, said to have been collected in 1912 from a gravel pit at Piltdown, East Sussex, England.

The Piltdown hoax is perhaps the most famous paleoanthropological hoax ever to have been perpetrated. It is prominent for two reasons: the attention paid to the issue of human evolution, and the length of time (more than 40 years) that elapsed from its discovery to its full exposure as a forgery.
