On this day...

In 1863, the **Southern Bread Riots** took place as thousands of people, mostly women, broke into shops in the Confederate capital of Richmond, Virginia and began seizing clothing, shoes, food and even jewelry before the Militia arrived to restore order.

Quote:

"Our progress as a nation can be no swifter than our progress in education. The human mind is our fundamental resource." - **John F. Kennedy**

Fact:

The **CN Tower** is a 1,815.4 ft. high concrete communications and observation tower in downtown Toronto, Ontario, Canada that was completed in 1976, becoming the world's tallest free-standing structure and world's tallest tower at the time.

In 1995, the CN Tower was declared one of the modern **Seven Wonders of the World** by the American Society of Civil Engineers. It also belongs to the World Federation of Great Towers, where it holds second-place ranking.

"WHAT IS IT LIKE TO BE A WOMEN IN PHILOSOPHY (OF PHYSICS)?": A woman in philosophy of physics is doubly-isolated. First, she's isolated from other philosophers of physics on account of her gender, and then she's isolated from most self-identified feminist philosophers on account of her area of specialization. That's a self-pitying answer to the question posed in the title.

Laura Ruetsche, professor and chair of philosophy at the University of Michigan will speak on this interesting topic **Monday, Apr. 7**, 5:30 - 7 p.m., room 213, Pray-Harold. More hopeful answers point toward opportunities for communication and alliance across disciplinary boundaries. I will try to develop and defend some more hopeful answers -- and also to explain why I take my work on the foundations of quantum field theory to support the significance of philosophical feminisms.

CAREERS IN AGING: Learn more about the career paths these professionals took to reach their current positions, what they enjoy most about their work, and what they find most challenging. The event will be on **Tuesday, Apr. 8**, 3:30 - 5 p.m., in room 300 Halle Library. A question and answer period will follow. Please contact Ashley Smith at asmit243@emich.edu with any questions.

He will talk about "Computational Thinking for All: The Power and the Peril." This lecture will explore how technology enables multiple representations in the sciences, arts, and humanities, giving us the opportunity to be more fully human as we seek new knowledge in service to society. Moving "beyond PowerPointless-ness," we have the opportunity to demonstrate that computing really matters in teaching and learning. Computing "matters" because quantitative reasoning, computational thinking, and multi-scale modeling are the intellectual "heart and soul" of 21st Century science and therefore are the essential skills of the 21st Century workforce.
