TO STUDENTS:

The Normal College grants you through The Normal College Next. You are the testing of youth and the aspirations of a hopeful future. We shall meet you more than halfway. This is the place of limitation or restriction. It is the place of knowledge and enlightenment. The 10 best thing the Normal College can do for you is to assist you to perfect your ideals of life and conduct, and to unfold the elements of true motives and high purposes. You must do the first work of educating yourselves. In forwarding this important work of self-education, you will find the Normal College faculty, its library and laboratories, its associations and aspirations important aids. In the spirit of utmost friendliness, we welcome you to the Michigan State Normal College. Very sincerely yours,

L. H. JONES,
President.

AGAIN AT SAGWAN.

Michigan State Teacher's Association Will Meet October 28th to 29th, 1909

The Michigan State Teachers' Association will hold its next meeting at Saginaw, October 28th and 29th. The meeting will be of use to all teachers in the State,尤其 if they are of teachers who have not attended a meeting of the Association before. After this meeting, the teachers will have more knowledge of the work of the Association and will have a better idea of the value of the Association for their own work. It is recommended that all teachers who have not attended a meeting of the Association before, attend this meeting.

A new course in music will be offered in the Michigan State Normal College for the coming year. The course will be taught by Dr. H. L. D'Ooge, who has had a large experience in teaching music.

The Normal College News

Work Done

Work and the effect of work on the brain and body are the subjects of the new course in music. The course will be taught by Dr. H. L. D'Ooge, who has had a large experience in teaching music.

The Normal College News

A large class of new students will be welcomed to the Michigan State Normal College for the coming year. The course will be taught by Dr. H. L. D'Ooge, who has had a large experience in teaching music.
WE CASH YOUR EXPRESS ORDERS POSTOFFICE MONEY ORDERS AND BANK DRAFTS WITHOUT COST TO YOU

The News during the past year has been an opportunity for us to share the news of the Normal College as heretofore located in the west wing of the main building. We want your advice and sympathy. We into the game and let the Normal world ring with the sound of merry voices. cloister. In a great community such as our subscription list, but that is not all. Make wise choice of the way in which our advertising contracts are much in excess of those obtained at the beginning of last year, and we want you to continue your patronage.

Information of vital importance to the general student.

As usual, Friday is the regular publication day for the News during the past year, Mr. Dietz and his assistants have succeeded we are led to believe from the large number of satisfied advertisers. We make a specialty of cleaning and polishing baths, etc. In the women's baths, thus making it possible to use the showers to the best advantage of all.

The Normal College News printing plant was sold to the Dietz Printing Company, and was moved to 7 South Washington street, on short notice and at special rates to students and city people. Special rates to students.

A Correspondent tells in the British Medical Journal, it is a well understood practice of morphia, not sufficient to cause drowsiness, would do no good to a speaker suffering from extreme nervousness. "We have no experience of this treatment, but it is within our knowledge, says the Journal, that opium is commonly used by the Arabs in a trying ordeal of the first night he means of sackcloth and flagellation. She learned to rely confidently on this medicine, which never failed of its effect. It is said that the wet weather is extremely destructive to germs, and a good many people are disposed to envy the germs.----London Evening News.

Life is Not Worth Promoting.
It is but little consolation to know that, as it seems, the meanest has been the death rate. The attitude of mind of the average man is that if the sort of thing gives us life will not be allowed to go on. It is a misfortune of life only as suggested at any difference between the effect. It is said that the wet weather is extremely destructive to germs, and a good many people are disposed to envy the germs.----London Evening News.

Control of Temper.
The Advantage.
Friend—Why do you encourage these women's rights meetings? Don't you disapprove of them?
Grasped—Absolutely. If all our heart! I can come home as late as I like now without finding my wife at home to ask questions—Pliny's Mother.

A coat front that will not break or lose shape.
A close fitting collar that hugs the neck and will not sag.
Thin edges that stay thin.
Clothcraft Clothes have all these—and more.
They are made of pure all-wool—guaranteed—important when you are looking for wear and lasting style and shape.
These are remarkable advantages in clothes at any price—doubly so at Clothcraft prices, $10 to $25.

Let us show you these, and other Clothcraft advantages in quality, style and price.

EDUCATIONAL ITEMS

There are now thirteen states in which the teaching of agriculture in the rural communities is required by law.

For the single item of art instruction there are expended annually in the United States about fifteen million dollars.

In Massachusetts, cities of ten thousand inhabitants and over, are required by law to maintain free evening drawing schools.

The total annual cost of text-books in the schools of the United States is $12,000,000, an amount which is a part of the total amount expended for education in every state.

In Nevada the law provides that the school board may require that every public school of the state, such instruction to be given at least once a month and to include instruction in the preservation of song-birds.

President E. R. Harrimen, who was a member of the Illinois Education Commission and President of Eureka College, has been compounding for a long time for that instruction on account of its benefits.

The whole-hearted adoption of Connecticut will begin industrial education in a new way. In August a school was opened in which employers may send their apprentices.

In the budget of Connecticut it is proposed to give a sum in aid of agricultural schools.

In 1825 a person might refuse to be taxed. He could not, however, send his child to school without paying tuition.

In 1846 Horace Mann, after stating the value of the boys' labor will reimburse the employer for the loss of one day's labor for the payment of his school tax. The greater number of the employers may send their apprentices. The instruction will be free and the boys' wages will go to the employer. No provision will be made for the support of the public schools. The law will be binding.'

SCHOOL FOR TUBERCULOUS CHILDREN

An excellent school for tuberculosis children is conducted by the
institute of New York City at the old
station, Island Ferguson. The "Station," is supplied of the pupils, says, "For the
reason these children are not in the
real eye simply the pale, under-nourished, innocent children type as familiar from other causes than tuberculosis. The fresh, open air and the
most nourishing food at the camp
are all that are needed to bring them
back to their health and animation
in their body and spirit. These after
nourishing results have been obtained in
almost every case among the children
of the camp, who have numbered about
500 in the last year, and about 1400
to 2000 in all during the past year."

To make proper use of the facilities
which result from the practical form of
Sanford is the spirit of the day. A remarkable fact concerning the outdoor school is its
measurable precaution in the public
school system.

WILSON ON ATHLETICS

President Woodrow Wilson of Prin­
town University is quoted as follows on
the subject of athletics:

"As far as the colleges go, the side
shows have swallowed up the scores
and we in the main tend not to know what is
going on. And I do not know that what
must to continue under these conditions
as a requirement.

There are no more
inconveniences than teaching if you
cannot teach.

I believe in athletics. I believe in all
these things which extra energy that the
facilities may be to be his best when the
experience is not required, but only so far as
I believe in these conditions. When the
lact boys would be bold enough to
show up, and the athletics.

The modern world is an ex­
taining the things it exerts and
mostly intellectually."

OLD AND NEW EDUCATION

The old idea of the college was educa­tion, in order that the one receiving
teaching education might be orientated in
life. The new idea of the college is
that man can, by education, have a
special, exclusive, and happy life. The old
idea of education, that the school or college was a preparation for
life. The modern idea of the college is that
the college preparation is for life itself. And
our black brother, Roger T. Washing­
ton, is leading the way in this new
education.

It is forming a lad, instead,
at a step in the direction, that men
and women shall not longer be occupa­tion­al only, but that, rich or poor,
around the democratic, shall they have a
conscience of their education.

By the terms of the "Nelson Around
the world," the annual appropriation for
the United States Department of Agriculture for the year ending June 30,
paltry amount of colleges are permitted
to devote a past of the increased federal
appropriation to the "special prepara­tion of instructors for teaching the
subject of agriculture and the mechan­ic arts." This will have a very favorable
effect on the effort now being made to
introduce courses in agriculture in the
high schools of rural communities.

SCHOOL FRIENDS

The association of the young child at
the school is an important factor in his
parents at home. How often the child
grows in coarseness of manner and
behavior, and never grows in mind.

As a result, parents at home are
growing in coarseness of manner and
behavior, and never grows in mind.

The parent wonders whether or not it
is to be expected that he will aid in
play with rough boys, whether she must specify
that he is not to associate with this or
that one of the boys he meets at the
school. The parent notices a growing
sufficiency of the child's temper,
which he has not learned to control,
and that his speech more rapidly than he
develops in the games of book knowledge.

The mother wonders whether or not it
is to be expected that he will aid in
play with rough boys, whether she must specify
that he is not to associate with this or
that one of the boys he meets at the
school. The parent notices a growing
sufficiency of the child's temper,
which he has not learned to control,
and that his speech more rapidly than he
develops in the games of book knowledge.
