Produced by the Office of Public Information

Theater season will present eclectic mix of comedy, drama and romance

The Communication and Theatre Arts Department will open its 1993-94 season with a hold-over performance of Craig Lucas' "Prelude to a Kiss," Sept. 9-11, Thursday through Saturday, in Sponberg Theatre (see story at right).

Other productions planned for the season are:

- "To Kill A Mockingbird" Oct. 8-10 and 14-16. Harper Lee's classic, dramatized by Christopher Sergel, features a young girl named Scout, growing up in a quiet southern town in the 1930s. Childhood fascination is threatened by the rumblings of racial conflict when Scout's father defends an African-American in a trial that turns friendship into hostility and tranquillity to turmoil.
- "Agnes of God" Nov. 5-7 and 11-13. John Pielmeier's

drama features a battle between science and faith when a child is born to Sister Agnes "without benefit of man." To the investigator, Dr. Martha Livingstone, the

matter is mere fraud to be quickly exposed, but to Mother Superior, it's a possible miracle to be

Season opens with special showing of last year's hit 'Prelude to a Kiss'

The Department of Communication and Theatre Arts will open its 1993-94 season with a hold-over presentation of Craig Lucas' "Prelude to a Kiss" Thursday through Sunday, Sept. 9-11, in EMU's Sponberg Theatre.

In Lucas' romantic comedy, a young couple meets, falls in love and marries. When an elderly gentleman wanders into the wedding and exchanges a kiss with the bride, reality becomes fantasy. New York Times critic Frank Rich said the play "takes...romantic comedy in directions that are idiosyncratic and challenging," and called the results "exhilarating."

Tickets are \$8 Friday and Saturday, with a \$2 discount for EMU students and \$3 discount for Mainstage Members. Thursday is "Bargain Night," with all tickets \$5.

Showtimes are 8 p.m. nightly.

Lecture series includes Greenpeace founder

The Office of Campus Life will host the founder of Greenpeace and U. S. Rep. Pat Schroeder this year as guests of its Spectrum Lecture Series.

The series will kick off Wednesday, Sept. 15, with a presentation by Bill Demby, star of the award-winning DuPont television commercial where he plays basketball on artificial legs, at 7 p.m. in EMU's McKenny Union Ballroom (see story at right).

The series will continue with a lecture by Douglas Crimp, professor of art and history at the University of Rochester and AIDS and gay activist, Monday, Oct. 11, in McKenny Union's Guild Hall.

The performance troupe "The Wizard of AIDS" will perform Monday and Tuesday, Nov. 29 and 30, in Sponberg Theatre, presenting a parody of L. Frank Baum's classic tale of Oz that shares its AIDS prevention message with humor and compassion.

The fourth presentation in the series will be a lecture by U.S. Rep. Patricia Schroeder (D-Colorado) Sunday, March 20, in the McKenny Union Ballroom. Schroeder is a well-known political figure and one of the nation's most outspoken proponents for women's issues.

The final lecture in the series will be given by Paul Watson, founder of Greenpeace, Tuesday, April 19, in the McKenny Union Ballroom. Watson now is the head of Sea Shepherd, an organization

Disabled Vietnam veteran Demby speaks Sept. 15

The Office of Campus Life will host a lecture by Vietnam veteran Bill Demby Wednesday, Sept. 15, at 7 p.m. in McKenny Union's Ballroom as part of its Spectrum Lecture Series.

Demby, who lost both legs as a result of wounds suffered in Vietnam, is featured in the award-winning DuPont television commercial where he plays basketball with two artificial legs, made of a DuPont plastic.

After undergoing rehabilitation, Demby says he realized participation in sports would give him the self-confidence he needed to excel in life. Demby joined the Achilles Track Club, an organization of physically disabled athletes, and was soon competing as a wheelchair athlete in marathons and 10K races.

In 1984, Demby became one of the original testers of a new artificial limb called the Seattle Foot, originally developed for the U.S. Veterans Administra-

CAMPUS CAPSULES

Focus EMU Begins Fall Schedule

This is the first issue of *Focus EMU* for the 1993 fall semester.

It will be published next Wednesday, Sept. 7, because of the Labor Day holiday and every Tuesday after that.

The deadline to submit copy for consideration will continue to be 5 p.m. Tuesday for the following Tuesday's issue.

Campus Parade Entrants Sought

Organizers of EMU's 1993 Homecoming, scheduled for Saturday, Oct. 9, are seeking University departments and organizations interested in marching in the parade or entering a float.

The theme for this year's Homecoming is "Discover the Magic" and a \$1,000 cash prize will be awarded to the best float entered in the parade. Cash prizes also will be awarded for second, third and fourth place floats.

For more information, call Pam Cardell at 7-1220 or Molly Motherwell at 7-2229.

Host Families Needed For Foreign Students

The Foreign Student Affairs Office is seeking host families or individuals to provide social interaction to EMU foreign students.

Each term, new foreign students at EMU are invited to be a part of the World Hospitality Program, which links foreign students with host families for on-time get-togethers or long-term friendships.

The social interactions can vary from host to host and student to student depending on their interests. They range from getting

together so the student can practice English to the student living in the home. Most interactions are one-time get-togethers such as attending a sporting event, going to a museum or on a picnic, or just going to the host family's home for a meal or an American holiday.

This fall, there are 1,200 foreign students, trainees, professors, specialists and researchers at EMU from more than 80 countries. The WHP links approximately 300 students with host families and/or individuals each year.

For more details, contact Paul Dean Webb, Foreign Student Affairs Office or call 7-3113.

Workshops Planned On Graduate School Awards

Workshops on preparing applications for Graduate School Awards, including sabbatical leaves, research fellowships, spring/summer and research support funds will be held Tuesday and Wednesday, Sept. 14-15 from 3 to 4:30 p.m. in Reception Rooms A and B of McKenny Union.

Guidelines and application materials will be available at the workshops or may be picked up at the Graduate School. (NOTE: The guidelines have not changed from last year.)

Continuing Ed Creates Student Center

Continuing Education has embarked on an organizational improvement initiative designed to enhance its ability to serve student customers by providing them with easier access to accurate and timely information about Continuing Education's full range of programs and services.

A Continuing Education Student Information Center has

been created in Room 321 Goodison Hall, which will house the main Continuing Education switchboard and will be staffed by a full-time customer service representative. In addition, all printed materials relating to Continuing Education will be available there.

The creation of this center has resulted in the following address changes: CE Main Administrative Office - 306 Goodison Hall; CE Student Information Center - 321 Goodison Hall.

Grant/Proposal Writing Course Is Offered

EMU will dedicate three weekends to an intensive course in grant and proposal writing this fall. Offered through the Arts Administration Program, the course will focus on conceptualization, research and collaboration leading to successfully funding proposals.

The course, offered through Continuing Education, will emphasize the actual development process. Participants will take their individual proposals from idea to implementation.

It will be held the weekends of Oct. 8-9, Nov. 8-9 and Dec. 10-11.

Class enrollment is limited to 15.

For registration information, call 7-1220.

Used Book Sale To Be Held At Arborland Mall

Thousands of used books, some rare and all in mint condition, will go on sale when the Ann Arbor Branch of the American Association of University Women begins its 41st Annual Book Sale Friday, Sept. 17, at Arborland Mall on Washtenaw Avenue.

Butler U's Stein named women's hoops coach

Paulette Stein, head women's basketball coach at Butler University for the last five years, has been named head women's basketball coach. Her appointment is effective immediately subject to approval of the EMU Board of Regents. She replaces Dana Munk who resigned in July.

Stein enjoyed a successful tenure at Butler, recording an 87-57 record and earning two Mid-

western Collegiate Conference "Coach of the Year" awards during her five seasons. She resigned her position at Butler earlier this summer. Her Butler teams played EMU twice and won both games, by a 69-59 decision Dec. 1, 1991, in Indianapolis and an 89-72 victory Dec. 12, 1992, in EMU's Bowen Field House.

"I'm very happy to take over the EMU women's basketball program," Stein said. "There is definitely potential here. The team has promise and the players want to win."

The 46-year-old Stein has developed successful programs at

See Stein, page 4

Ford Gallery shows new work by faculty artists

A display of new art by Eastern Michigan University faculty members Diana Kulisek and George LaRou will be on display Wednesday, Sept. 8, through Friday, Oct. 1, in EMU's Ford Gallery.

Titled "Innocents, Infidels and Inquisitors," the exhibit will focus on medieval images and concepts. Kulisek's ceramic and terra cotta sculptures will feature the mezzomaioica technique used in Italy during the 1500s and Medieval Islamic imagery. LaRou's mixed media work will feature reliquaries about religious figures and will center around medieval politics and economics.

Kulisek, assistant professor of art, holds a 1969 bachelor's degree from Wayne State University and a 1989 master's degree from Alfred University. She taught at Alfred University from 1987 to 1989 and at both the Center for Creative Studies and Henry Ford Community College in 1990-91.

LaRou, assistant professor of art, earned a bachelor's degree from the University of Southern Maine in 1982, a second bachelor's degree in fine art from the Portland School of Art in 1988 and a master's degree in fine art from the California Institute of Arts in 1990. He taught at the California Institute of Arts from 1988 to 1990 while also teaching at the Portland School of Art from 1989 to 1991.

An opening reception for the exhibit will be held Wednesday,

Ford exhibits run monthly all year

"Innocents, Infidels and Inquisitors," a display of new art by faculty members Diana Kulisek and George LaRou (see story at left), is just the first exhibit in a full season for EMU's Ford Gallery.

- Other exhibits will include:
- the Annual Faculty Exhibition Wednesday, Oct. 6, through Friday, Oct. 29;
 - the Graphic Design (Visual Communications) Exhibition Wednesday, Nov. 3, through Wednesday, Nov. 24;
 - a Painting Exhibition featuring the work of Jay Constantine Wednesday, Dec. 1, through Friday, Dec. 17;
 - a Pinhole Photography showing Wednesday, Jan. 5, through Friday Jan. 28;
 - a Printmaking Exhibition featuring Kim Bauer and Therese Bauer Wednesday, Feb. 2, through Friday, Feb. 18;
 - the Annual Student

See Art Exhibits, page 4

Sept. 8, from 3 to 5 p.m. in Ford Gallery.

Gallery hours will be Monday through Friday from 9 a.m. to 5 p.m.

For more information, contact the EMU Ford Gallery at 7-0465.

Theater, from page 1

examined. As these women debate science with the supernatural, they face the harsh realities of their lives and present audiences with new meanings of faith and commitment to love.

• "Amber Waves" Dec. 10-12. James Still's American Alliance for Theatre Education Distinguished Play Award-winner follows 12-year-old Deb and 16-year-old Scott as they face their family's uncertain future with humor and honesty. This contemporary farm family triumphs in its ability to heal as it struggles with financial and spiritual challenges in EMU's annual holiday play for the whole family.

• "The Wild Duck" Feb. 4-6 and 10-12. Henrik Ibsen's tragedy-comedy features Gregor Werle, who finds his way into the Ekdal household and clumsily shatters the home's foundation with the revelation that the sensitive young daughter has been fathered elsewhere. In Ibsen's world of irresponsible righteousness, only the audience is set free to laugh at the foolishness until a shattering climax proves "virtue to be its own

punishment."

• "Into The Woods" April 8-10 and 14-16. Based on the book by James Alpine, this play combines Tony Award-winning music by Stephen Sondheim with Grimm's most famous fairy tales such as Cinderella, Little Red Riding Hood, The Baker's Wife and Jack in the Beanstalk, all woven into a modern fantasy.

Curtain times are 8 p.m. Thursday - Saturday, and 2:30 p.m. Sunday, except "Amber Waves," which will be shown at 2:30 p.m. both Saturday and Sunday.

Ticket prices are \$8 for the general public, \$6 for students and \$5 for Mainstage Members Friday and Saturday. Thursday is "Bargain Night," with all tickets \$4.

Performances will be held either in the Quirk or Sponberg theatres, which are located side-by-side on the EMU campus.

For more information or to purchase tickets, call the EMU Arts and Entertainment Box Office at 7-1221.

Music Department kicks off season with 'Crater Lizards' cello recital

Editor's note: Due to the length of the Music Department's fall calendar of events, only the September events are listed here. Similar monthly listings for October, November and December will be included in future issues of Focus EMU.

EMU's Music Department has a series of concerts and recitals scheduled in September beginning with guest cellist Jeffrey Krieger, who will perform on electronic cello Tuesday, Sept. 14, in the Alexander Recital Hall at 8 p.m.

Krieger will perform "Crater Lizards," written in 1986 for electronic cello by New York composer Carlos Rodriguez.

Krieger, a specialist in the performance of new music, is principal cellist of the Hartford Symphony, a chamber musician and a solo recitalist. He plays an electronic cello built by Vermont craftsman Tucker Barrett.

This fall, Krieger will premier works for electronic cello by the Lithuanian composer Osvaldas Balakauskas at Merkin Concert Hall in New York; collaborate with composers Ken Steen and Robert Carl on two electronic cello concertos; and premier other solo works by Alvin Lucier, Neely Bruce and Canadian Brent Lee.

Krieger holds a master's degree from the Yale School of Music.

Krieger also will conduct a cello workshop Wednesday, Sept. 15, in

the Alexander Music Building, with time to be determined.

Other events planned in September include:

- A multi-media presentation of R. Vaughan Williams' *The House of Life* Sunday, Sept. 19, in Alexander Recital Hall at 4 p.m. It will feature artists Jeffrey Willets, EMU graduate assistant, singing tenor; Rebecca Straub, EMU alumna, on piano; Julie Schneider, EMU secretary, as visual artist; Frederick Herr, EMU student, as photographic artist; and dancers, EMU alumna Suzanne Willets-Brooks and guest performer Scott Read.

- Guest artist Jeffrey Blersch, who will conduct the first of two organ recitals Tuesday, Sept. 21, in

the Organ Recital Hall at 8 p.m.

- The annual EMU faculty recital featuring Gary Pedersen, assistant professor of piano, and Donald Hartmann, assistant professor of voice, in Alexander Recital Hall Sunday, Sept. 26, at 4 p.m.

- A concert by the EMU Concert Winds and Symphony Orchestra under the direction of Professor Max Plank and Assistant Professor Kevin Miller, Thursday, Sept. 30, in the Ypsilanti High School auditorium at 8 p.m.

All music events are free unless otherwise noted.

For more information, call the EMU Music Events Hotline at 7-4380.

Elderwise Program plans open house Sept. 22 at McAuley Senior Building

EMU's Elderwise program, a collaborative "learning-in-retirement" program for area senior citizens 50 years old and over, will kick off its fall '93 program series with a free open house Wednesday, Sept. 22, from 9 a.m. to noon in the Multipurpose Room of Ann Arbor's McAuley Health Complex Senior Health Building.

The open house will feature an orientation to Elderwise and a presentation by Liz Elling, development officer for Nichols Arboretum, on the 100th anniversary of *The Tale of Peter Rabbit* titled "The Tale of Beatrix Potter: The Rest of the Story," a discussion of the author's life and work.

The Elderwise program began in the fall of 1991 as a cooperative effort between EMU and McAuley Health Complex to offer low-cost, life-long learning opportunities for senior citizens. The program now has approximately 200 active members.

Other Elderwise activities scheduled for fall include:

- Courses/discussion groups on American foreign policy; the lives of Thomas Jefferson, Abraham Lincoln and Eleanor Roosevelt; theater performance; mid-19th century opera; and the history of the "Big Band" era. Course fees average \$20 for Elderwise members and \$40 for non-members, with the groups meeting approximately five times between September and Novem-

ber. The Big Band course will meet twice in October at a fee of \$8 per member and \$12 for non-members.

- A "Nature Potpourri," featuring three one-hour sessions along various nature trails, either in person or through slide presentations.

- "Widening Horizons/Travelogues," featuring slide presentations and discussions about Western Europe (Oct. 27), Berlin (Nov. 2) and Russia (Nov. 16).

- Several special events, including an orientation session for people interested in Elderwise's planned 1994 trips to London and China; an overnight trip to

Pinckney Pines Retreat Center Oct. 19 and 20; regular Friday morning social gatherings; and a holiday party Nov. 18 featuring storyteller David Park Williams.

Registration is required for all Elderwise events, including the Sept. 22 open house. The Elderwise membership fee is \$20, which provides a discount rate on all Elderwise programs, voting privileges and Elderwise news publications at no additional charge.

For more information, call the Elderwise office at (313) 572-2035 Wednesdays from noon to 4 p.m. or EMU's Continuing Education office at 7-0409.

Parking moves to 'hang tags' for a variety of reasons

Many long-time members of the faculty and staff have been asking why the University Parking Department began using rearview mirror "hang tags" as parking permits this fall after years of using traditional windshield parking stickers.

According to Manager of Parking and Paving Al Robinson, the switch was made for a variety of reasons.

"From a parking enforcement standpoint, the hang tags are just easier for ticket writers to read, especially in snowy weather when there's snow all over the windshield," Robinson said. "Now, they won't have to walk up to each

car and scrape the snow off to see if it has a parking permit. They should be able to stand away from the car and see the tag."

Robinson also said parking officials hope the tags will be more convenient for users, as the stickers were often hard to remove from windshields and the pouches many people placed them in tended to sag and fall off.

Where the Parking Department used to issue two stickers to faculty and staff who had two cars, everyone will now get one hang tag and can switch it from car to car depending upon which one they drive to campus.

See Parking, page 4

Demby, from page 1

tion. The foot was more flexible than the prostheses Demby previously used, allowing him to move, jump and play stand-up basketball again.

Demby competed with the United States Amputee Athletic Association in the 1988 Paralympics in Seoul, Korea, and, during the summer of 1990,

participated in a Peace Marathon in Moscow, held to unite both Soviet and American veterans.

In addition to traveling around the country and lecturing to colleges and corporations on the issues of the disabled, Demby is a part-time counselor with the Howard County (Md.) "disAbility Awareness Project," where he counsels individuals with disabilities, particularly encouraging and

motivating disabled children.

Demby has been the recipient of many awards, including an Academy Award presented by the National Academy for the Advancement for the Handicapped in 1988, a Presidential Victory Award presented at the White House in 1989, a California's Governors Award of Excellence in 1990 and an Outstanding Disabled Veteran of the Year Award in 1990.

FOCUS ON FACULTY

Holkeboer book addresses the many challenges freshmen face

By Debra Fitzgerald

As more and more colleges and universities open their doors wider, providing entrance to students who would never have been admitted a decade ago, they are having to face the difficult challenges of helping underprepared students succeed and graduate.

Dr. Robert Holkeboer, director of the University Honors Program, has written a book on addressing those challenges. "Right From the Start: Managing Your Way to College Success" (Wadsworth Inc., 1993) had a first printing of 40,000 copies, indicating the publisher's confidence that colleges nationwide are looking for ways to help unprepared students succeed.

"There are more freshmen now who are unprepared, both because colleges are opening their doors wider and because high schools aren't preparing them as well," Holkeboer said, "but mainly because colleges have just become more accessible. If you're going to admit students who 20 years ago wouldn't have gotten into college, then the only responsible approach is to do whatever can be done to help them succeed."

Holkeboer's book is designed to be used in freshman orientation courses, which are offered now at nearly 65 percent of the nation's 3,500 colleges and universities. EMU has such a course and will offer 15 sections with 25 students in each this fall. EMU's course, in fact, is a national model because it pairs professors and staff members who also are male and female and represent the majority and a minority group to team-teach the course.

The EMU course, like Holkeboer's book, covers the basic of skills development, such as time management, study habits, etc., but also includes sections on diversity on campus, drug and alcohol use, relationships and life outside of

class. Though it is not a required course at EMU, Holkeboer thinks maybe it should be.

"It was designed for students who are coming here unprepared, maybe they didn't have a good education or don't have a good home life, but as the word has gotten out, more and more students have come to see the value of the course," he said. "We have quite a few honors students taking it. Honors students get drunk, too, and they get sexually transmitted diseases. They're no different than anyone else."

Indeed, while such courses were first designed as academic skills building courses, they have evolved over the past few years to address other problems first-time students have in college.

"Alcohol (abuse) is a major issue because so much goes along with that," Holkeboer said. "Ninety percent of campus crime is alcohol-related, date rape is alcohol related, sexual promiscuity and transmission of sexually related diseases, not studying for tests because you're up all night partying, sleeping through class. Just about all the trouble you can get into in college is related to alcohol."

The approach Holkeboer uses in his book attempts to help students realize what they're giving up by drinking and partying their way through school. "Every hour you spend in class you're spending from \$37 to \$84, so if you sleep through class or don't show up or don't care, you might as well take a handful of dollar bills and fling them into the sea," he said. "Sooner or later, students catch on to this, but often it's later or too late. The first few weeks of the first semester are pivotal."

Holkeboer's book also has values clarification exercises to help new college students figure out why they're there in the first place.

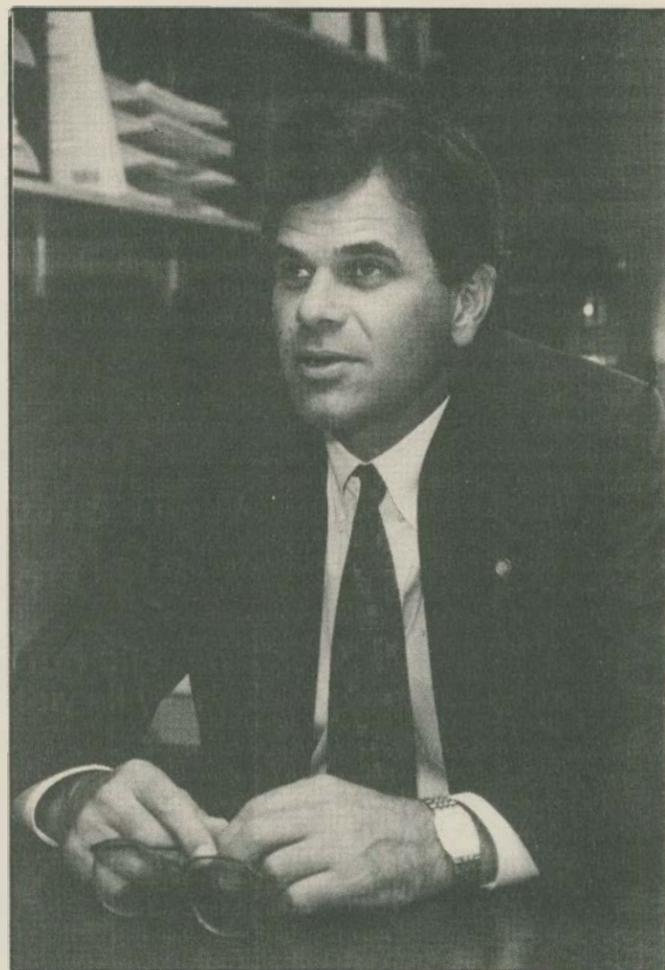

"Goal setting is very difficult for them, even heart wrenching, but we don't put pressure on them to choose a major or a career right away," he said. "It's more important to learn to think through how you enjoy spending your time, what you enjoyed as a child, what things you could spend hours doing, and how you can incorporate those motivations into your life today, rather than thinking it all has to come to an end."

The book also addresses cultural diversity, often one of the most difficult issues new college students face.

"A lot of students come here and they have culture shock because they come from a small town and they're not used to teachers who may not speak English very well or eating with blacks in the dining commons, so they try to find a friend from the same small town and create this fantasy of that town here at EMU," Holkeboer said. "You have to gently urge these people into a wider perspective on life that even if they don't value different cultures, at least they accept that they exist and that you're going to have to work side-by-side with people who are different than you and don't share your values and beliefs."

While critics of such courses argue that colleges shouldn't be admitting students who can't make the grade, Holkeboer, who has been teaching since 1965, argues that the world today's students face is vastly different from the world even 10 years ago.

"We've got to rethink what college is and how much the world has changed, instead of insisting that college be what it was when we went there," he said. "When I was in college, it never occurred to me that I might not get a job, it was really just a matter of which job I would choose. Now, we're in such

EMU Honors Program Director Bob Holkeboer's new book "Right From the Start" provides a comprehensive look at the many challenges today's college freshmen face, from managing time to managing alcohol.

a precarious situation with jobs disappearing and not coming back. Students are scared.

"To say that a student who drops out just wasn't meant to go to college is to dismiss our own responsibility," he added. "We have a responsibility to be role models, to give support, and to teach people how to address their problems and make changes through a systematic effort of

establishing goals and working through a plan."

Holkeboer has taught EMU's freshman orientation course for several years and said he believes it's making a difference. "We think there are people whose lives have been changed by taking this course," he said. "I'm stunned by how many students are still around a couple of years later, students that I really didn't think would be."

Profile shows students were older, more racially diverse in '92

By Wilandrea Blair

In 1992, the EMU student body was a little bit older, more racially diverse than in previous years and most likely majoring in the College of Arts and Sciences, according to EMU's most recent student profile report prepared by the Office of University Planning, Budgeting and Analysis.

The annual report gives a student demographic overview detailing age, race, gender, citizenship, college and major, aptitude test scores and high school grade point averages.

Based on fall 1992 enrollment figures, EMU admitted fewer new freshmen and more transfer students than in any semester since 1980. The number of first-time-in-any-college (FTIAC) students has declined each fall since 1988 when it reached a high of 2,708 students. Since then, FTIAC numbers have been 2,630 in 1989, 2,404 in 1990, 2,268 in 1991 and 2,229 last fall. Accordingly, the number of transfer students has grown from 1,641 in 1988 to 2,042 last fall. Graduate student enrollment remained stable at 5,814 students, representing an addition of only three students since fall 1991.

The age distribution showed a shrinking population of traditionally aged college students. While students age 18 still represent the majority of FTIACs at 74.3 percent, that is down 2.1 percentage points from fall 1991. Students age 19 enrolling in college for the first time was up two points to 19.3

The number of students age 19 enrolling in college for the first time was up two points to 19.3 percent of all FTIACs, indicating a delay in starting college for more and more students.

percent of all FTIACs, indicating a delay in starting college for more and more students.

Among all undergraduates at EMU, those ages 24 to 29 represent 18.6 percent of the student body, while those 30 years and older comprise 13 percent of all students. Nearly 57 percent of graduate students were 30 years old or older in fall 1992, with nearly 14 percent age 44 or older, an increase of nearly one percentage point.

Of EMU's first-time college students who provided race information, 79.01 percent were white, a drop from 82.77 percent just one year ago. The enrollment of black students showed a substantial increase over last year, jumping to 14 percent of all FTIACs from 1991's 11.37 percent. The Hispanic FTIAC enrollment also increased from 1.84 percent to nearly 3 percent.

Among all undergraduates in fall 1992, whites composed 83.71 percent of students; blacks were 9.75 percent, up from 1991's 8.52

percent; Asian students were 1.42 percent, a marginal increase; American Indian students were 0.44 percent, also a marginal increase; and Hispanic students were 1.71 percent, up from 1.5 percent in 1991.

The above figures omit 677 undergraduates who did not provide race information in 1992.

White students comprised 81 percent of graduate students in 1992, while the number of black graduate students remained relatively constant at 5.73 percent. Other racial categories also remained constant, with Asian students at 1.45 percent, American Indian at 0.39 percent and Hispanic at 1.28 percent. The percentage of foreign graduate students in 1992 declined from 10.6 percent to 10 percent.

These figures omit 440 students or 7.57 percent who did not provide race information.

Women continued to outnumber men at EMU, composing 57.5 percent of undergraduates, up from 57.3 percent in 1991, and 65.2 percent of graduate students, down slightly from 65.5 percent.

While the majority of EMU students continued to be Michigan residents, that figure decreased in 1992 from 91.5 percent of all undergraduates to 91 percent. More than 77 percent of those students came from Southeastern Michigan, while students from Ohio composed 4 percent of

undergraduates. EMU has a tuition reciprocity agreement that allows Ohio residents to pay in-state tuition. Non-Michigan U.S. residents totaled 6.1 percent and foreign citizens totaled 2.9 percent of undergraduates.

Among graduate students, 88.4 percent are Michigan residents, 9.2 percent are foreign students and 2.4 percent come from other states.

EMU's individual college enrollments demonstrated a mixture of gains and losses in 1992. The College of Health and Human Services experienced the highest rise in enrollment with 141 new students, which is a 7.6 percent increase from last year. The College of Arts and Sciences recorded the next highest growth in enrollment with an increase of 132 students bringing the total percentage to 38.3. The largest drop was in the College of Business which lost 178 students falling from 3,531 to 3,353 in 1992. More than 18 percent of undergraduates last fall had not declared majors.

The seven most popular undergraduate majors, in order of preference, were elementary education, special education, accounting, psychology, marketing, nursing and occupational therapy.

At the graduate level, three out of five of the colleges showed gains in enrollment while two saw declines. The College of Arts and Sciences added 14 graduate students bringing the total to a

record high 1,000 students. The College of Business experienced substantial growth of 10 percent or 67 new students bringing the total to 722 students. The College of Health and Human Services saw enrollment jump by 41 percent to total 93 graduate students. The College of Education and College of Technology fell by 4 and 1 percent, respectively.

The mean American College Test composite score for freshmen was 20.92 or 0.93 points lower than 1991. The Scholastic Aptitude Test average score was 897, a five point decline from 1991.

Men undergraduate students at EMU continue to score higher than women on both the ACT, averaging 20.62 to women's 19.92, and on the SAT, averaging 920 to women's 872. Women undergraduates, however, continue to enter EMU with consistently higher high school grade point averages than men at 2.97 to the men's average of 2.76. The average composite high school GPA was down from last year's 2.91 to 2.88.

The undergraduate GPAs for graduate students have remained generally consistent, with the composite in 1992 being 3.02, up marginally from 1991.

By college, composite undergraduate GPAs in 1992 were 3.12 in Arts and Sciences, 3.01 in Business, 3.03 in Education, 3.04 in Health and Human Services and 3.0 in Technology.

Parking, from page 2

"Unfortunately, some people were violating the spirit of our intent in issuing two stickers and giving it to their spouses who were attending classes here or had some other business, but were not University employees," Robinson said, "and we didn't think that was fair to everyone else. They should buy a commuter sticker like other students do."

Robinson added that the hang tags are merely being tested this year; their effectiveness will be evaluated at the end of the year and parking officials will determine which type to use.

Lectures, from page 1

founded to prevent the illegal killing of endangered sea life.

The lectures are free and open to the public.

For more information and presentation times, call the Office of Campus Life at 7-3045.

Focus EMU is published weekly from September to April and biweekly from May to August for the faculty and staff at Eastern Michigan University. The deadline to submit copy for consideration is 5 p.m. Tuesdays for the following week's issue. The deadline for submissions for "Events of the Week," which is prepared monthly, is the 15th of the month prior to the month the event will occur. Please send all submissions to: Editor, Focus EMU, Office of Public Information, 18 Welch Hall. Please direct any questions to (313) 487-4400.

Kathleen D. Tinney, assistant vice president, Executive Division

An Affirmative Action/Equal Opportunity Employer

RESEARCH

Separations Technologies for Pollution Prevention

The Environmental Protection Agency is inviting applications for cooperative research to develop and demonstrate new or newly applied separations technologies for pollution prevention and waste treatment.

Research on separation technologies that will prevent pollution at its source, create opportunities for recycling resources through recovery of usable raw materials, remove hazardous or toxic constituents from liquid or solid matrices and concentrate them so that constituents may be disposed of in a more environmentally sound manner.

The deadline for letters of intent is Sept. 15, 1993. For more information, contact the Office of Research Development at 7-3090. Refer to STFPD.DAS.

Conservation and Restoration Biology

The National Science Foundation is inviting applications for basic research aimed at clarifying the principles underlying conserving and restoring biological diversity. Areas include: Natural ecosystems, communities, species, populations and the genetic, behavioral and physiological processes occurring within them and human activities affecting them. Proposals may address any level of evolutionary, ecological, physiological or behavioral analysis or may seek to integrate across levels of disciplines.

The deadline for submissions is Sept. 29. For more information, please contact the Office of Research Development at 7-3090. Refer to CRS.DAS.

Stein, from page 2

every level. Prior to taking over the head coaching duties at Butler she was the head women's coach at Northern Michigan University where she recorded at 50-54 record in four seasons. She also was the head women's basketball coach at Augustana College from 1978 to 1984 where she led the team to a 96-57 record and at Clymer (N.Y.) High School where she started the program and led them to a 55-14 overall record from 1974 to 1978.

Stein's Butler teams won 20 games three times, 20-9 in 1989-90, 21-8 in 1990-91 and 23-8 in 1992-93, and she was named the top coach in the conference in 1989-90 and 1992-93. Two of her Butler squads received the school's first-ever votes in the Associated Press and USA Today polls, gaining a No. 20 ranking in 1990 and a No. 31 spot in 1993. She also guided the team to its first-ever post-season appearance

in the National Women's NIT Tournament in 1993.

A native of Whitehall, Pa., she holds a bachelor's and master's degree from Slippery Rock University, earned in 1972 and 1978, respectively.
