On this day...In 1969, America's first automatic teller machine (ATM) makes its public debut, dispensing cash to customers at Chemical Bank in Rockville Center, NY. ATMs went on to revolutionize the banking industry, eliminating the need to visit a bank to conduct basic financial transactions. By the 1980s, these money machines had become widely popular and handled many of the functions previously performed by human tellers, such as check deposits and money transfers between accounts. Today, ATMs are as indispensable to most people as cell phones and email.

Fact: [Alaska](#) is a U.S. state situated in the northwest extremity of the North American continent. Alaska is the largest state in the U.S. by area, the 4th least populous and the least densely populated of the 50 United States. Approximately half of Alaska's residents live within the Anchorage metropolitan area. Alaska's economy is dominated by the oil, natural gas and fishing industries, resources which it has in abundance. Tourism is also a significant part of the economy.
