GOOGLE DRIVE REPLACING U: DRIVE - FINAL REMINDER: In March, Google Drive will formally replace EMU-provided U: drives. Google Drive provides unlimited storage space to EMU faculty and staff, and allows files to be shared with others within and outside of the university. Google Drive also allows for easy file access from any computing platform (desktop, tablet, or mobile).

In addition to unlimited file storage space, Google Drive has mobile apps so you can access your files from your smartphone or tablet, too! There is also a tool that will allow you to sync all of the contents of your Google Drive to a desktop folder on your Windows or Mac computer. Full details on how to access your EMU-provided Google Drive account, where to get the mobile apps, and how to set up syncing are available at: [http://www.emich.edu/it/services/googleapps/drive.php](http://www.emich.edu/it/services/googleapps/drive.php).

The decision to decommission the use of EMU-provided U: drives was made because the storage technology in use is outdated and the available storage capacity no longer meets the needs of faculty and staff. (Please note that the departmental shared drives, known as the W: drive or the Z: drive, will remain available and are not affected by this change).

Anyone with files stored on their U: drive that they wish to keep must move those files to Google Drive (or another storage location) before March 1, 2015. Any files remaining on the U: drive after that date will be permanently deleted. Questions or concerns about this change may be directed to Rocky Jenkins at 487-3145 or rjenkins@emich.edu.

Individuals interested in the SAC position must apply for the service position. Applicants must be a student, staff or faculty member in good standing with the University. ATTENTION LINUX SERVER ADMINS: A significant vulnerability was recently discovered that affects almost all Linux based servers. The vulnerability is designated CVE-2015-0235 by researchers and commonly referred to as "Ghost" in the media. The Division of Information Technology (DoIT) has patched and restarted all Linux systems operated by DoIT but due to the serious nature of this vulnerability, DoIT advises that all other Linux server(s) hosted on the EMU network must be patched and rebooted. Action must be taken as soon as practically possible to resolve this vulnerability. Servers that remain vulnerable (unpatched) may be disconnected from the campus network until they are updated and restarted. Please direct questions or concerns to Rocky Jenkins at 487-3145 or rjenkins@emich.edu.

This event is free and open to the public.
